This report has been produced exclusively for the use of _____ and must not be copied, forwarded or disclosed without Wiki-Solar's express written consent.

This report is based on the projects listed on Wiki-Solar's database at the time it was produced. It is delivered 'errors and omissions excepted' and we do not warrant that it is complete, or that listed organisations will be suitable counter-parties for other projects. Our data protection registration prohibits us from providing specific contact details at individual companies.

The database comprises mainly projects of 4MWac+. The capacity figures in the final column of the projects window are the nominal AC capacity (or an estimate thereof if the nominal project capacity is expressed in MWp DC).
